GV Adjustable Projector Mount

Instruction Manual:

1. Install the Ceiling Mounting Bracket, (figure 1) using the appropriate anchors.

2. Do not exceed the recommended maximum ceiling tilt angle of 15 degrees, (figure 2).

3. The projector mount can also be installed through a false ceiling, (figure 3).

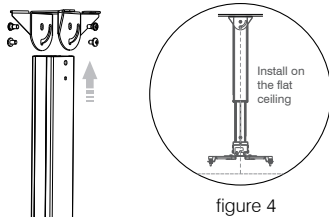

figure 4

- 4 (a) Connect the Main Post to the Ceiling Mounting Plate (Use accessory No 4) feeding the cables through the top of the Main Post and at the top of the Main Rear Cover Strip (2.4).

- 4 (b) Remove the Main Post Front Cover Strip (2.3) to locate the fixing screws and set the Adjustable Post at the required height. Again feed the cables down through the Adjustable Post and release the cables at the base of the Rear Cover Strip (2.5) (see figures 4 & 5).

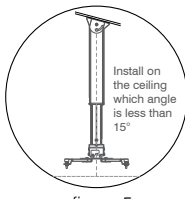

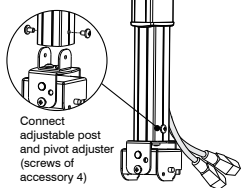

figure 5

- 4 (c) Insert and fix the Pivot Adjuster into the base of the Adjustable Post (use accessory No 4).

Connect adjustable post and pivot adjuster (screws of accessory 4)

5. Mount the Projector to the Projector Mount Plate before attaching to the Pivot Adjuster (use accessory No 3). Fasten all screws before fitting the Ceiling Cup to the ceiling (see figures 6 & 7).
