

Reply Mini Plus

The Reply Mini Plus is the little brother of the popular Reply Plus keypad. The same size as the Mini keypad, the Mini Plus offers greater capacity and more features straight out of the box.

With 14 elastomeric buttons for entering multiple choice responses or multi-digit string responses, plus send, raised hand, asterisk, and link buttons to provide additional functions, the Mini Plus is very flexible.

The Mini Plus handset can be bought in any configuration that suits your requirements. Determine the number of handsets you require, and we will provide you with a quote for the complete system. The Mini Plus and Reply Plus use a common base station and a mix of handsets can be used.

Components of a complete system:

- Mini Plus handsets – tell us how many you'll need.
- USB Base station.
- Powercom software – version capacity will match the number of handsets required.
- Padded Carry Bag.

Optional extras:

- USB Dongle – allows single software licence to load onto multiple computers.

Please Note: No Keypad Programmer for channel changing is necessary as this can be done on the handset.

Features

- User IDs – Addresses 1 – 500, Channel IDs 1 – 31.
- System Capacity – Standard Configuration – 500 keypads, choice of 31 channels for a maximum of 15,500 keypads per site. Arena model available.
- Each keypad has a unique and permanently assigned serial number. Serial numbers can be transmitted at the same time as responses.
- Supports static and dynamic addressing.
- Red and green LEDs.
- Uses two way RF communications to confirm transmission and receipt.
- Transmission range – 100m in an indoor area.
- Dimensions 76 x 38 x 10 mm, weight with batteries 30 grams. Suits wearing on a lanyard.
- Keypad colour – black.
- 2.4GHz Frequency Hopping Spread Spectrum System.
- Protected from interference from other RF devices WLAN, PDA, phones etc.
