

Reply Plus

The Reply Plus is the most popular keypad in the Reply Systems audience response range. With more features and capacity it offers maximum flexibility including secure log in, 12 character responses, and a 19 button keypad.

The keypad features 19 elastomeric buttons - Ten keys numbered 0-9 plus a "SYM" key allow entry of simple or sophisticated responses up to 12 characters in length (e.g. 1/2*345.067). Keys are also marked with "SMS" lettering for text responses.

Three 'soft' keys coordinate with response options shown in the display. The selections are programmable by software and include several options for simplified voting (e.g. Yes No, True False, Yes Abs No, etc). "Send", "Alert", "Search/Scan", "Clear", and "Power" keys provide additional functions. An audible keypress indicator can be enabled or disabled.

The display is a two line liquid crystal display that echoes user entries and displays messages from the Base Station. The LCD features electroluminescent backlighting, 12 characters per line and status icons to indicate battery level, response type, correct/incorrect response, login status, RF link activity, RF signal strength, keypad address #, channel #.

Components of a complete system:

- Reply Plus handsets – tell us how many you'll need.
- USB Base station.
- Powercom software – version capacity will accommodate the number of handsets required.
- Padded Carry Bag.

Optional extras:

- USB Dongle – allows single software licence to load onto multiple computers.

Please Note: No Keypad Programmer for channel changing is necessary as this can be done on the handset.

Features

- User IDs – Addresses 1 – 500, Channel IDs 1 – 31.
- System Capacity – Standard Configuration – 500 keypads, choice of 31 channels for a maximum of 15,500 keypads per site. Arena model available.
- Each keypad has a unique and permanently assigned serial number. Serial numbers can be transmitted at the same time as responses.
- Supports static and dynamic addressing.
- Uses two way RF communications to confirm transmission and receipt.
- Transmission range – 200m in an indoor area.
- Dimensions 134 x 54 x 26mm, 130 grams with batteries. Takes 2 x AA batteries.
- Keypad colour – light grey.
- 2.4GHz Frequency Hopping Spread Spectrum System.
- Protected from interference from other RF devices WLAN, PDA, phones etc.
